1. The locomotive department of the Hungarian National Railroads (MAV) in Budapest makes two locomotives a month. These engines are the improved Model 424 type and bear the numbers 426 or 427. Half of the locomotives manufactured go to the Soviet Union. The plant also makes steam road rollers, threshers and other farm machinery, cranes, auto buses, and tractor parts. Since 1952 it has also been manufacturing airplane engines and parts for heavy mortars.
2. There is also in Budapest, in Sándor Asztalos Street, an iron foundry where mines (Luftminen) are being manufactured. The workmen call these mines "Doves of Peace" in reference to Moscow's continual "Peace" slogans.
3. A building about 50 by 40 m. has been erected about 500 m. from Rákospalota, on the left side of the road to Fót. Adjoining it are two iron posts about 50 m. high and 100 m. apart. The installation is presumed to be a jamming station of the Hungarian radio.
